

 POUNDS TRANSFORMATION

LET'S TALK ABOUT

FIBER

BENEFITS OF FIBER

Blood sugar control (especially soluble fiber)

Reduced hunger

Heart health: fiber helps reduce cholesterol levels and blood pressure

Gut health: helps digestion, regularity, reduces inflammation

Women's health: can regulate estrogen levels to help with PCOS, breast cancer, as well as help with menstrual regularity and menstrual pain

WHERE YOU CAN FIND IT

PROTEINS WITH FIBER

Edamame (frozen, prepared), ½ cup, 4g fiber (9g protein)

Edamame (dry roasted), 1/3 cup, 8g fiber (13g protein)

Edamame pasta, 2oz or ¼ of package, 14g fiber (24g protein)

Tempeh, 3oz cooked, 6g fiber

FATS WITH FIBER

Avocado, half, 7g fiber

Chia seeds, 1 tbsp, 3.5g fiber

Flax meal, 2 tbsp, 3g fiber

Pumpkin seeds, ¼ cup, 2g fiber

Sunflower seeds, ¼ cup, 3g fiber

Nuts ¼ cup (**almonds** 4g, walnuts 2g, **pistachios** 3g, **hazelnuts** 3g, pecans 2g, **peanuts** 3g, **macadamia nuts** 3g, **brazil nuts** 3g) (cashews are not a good source of fiber)

Cacao nibs/powder; 3g fiber in 1 tbsp

Coconut, shredded/flakes, unsweetened, 3g fiber in 3-4 tbsp

CARBOHYDRATES WITH FIBER (COMPLEX CARBS)

BEANS

¼ cup **lentils** 4g fiber

¼ cup **chickpeas**, 3g fiber

2 ounces **hummus**... 2-4g fiber

¼ cup **split peas**, 4g fiber

¼ cup **black beans** 4g fiber

¼ cup **kidney beans**, 3g fiber

¼ cup **pinto beans**, 4g fiber

VEGETABLES

Broccoli, 1 cup, 5g fiber

Spinach (cooked), 1 cup, 4g fiber (6 cups raw)

Brussels sprouts, 1 cup, 3g fiber

Green beans, 1 cup, 4g fiber

Kale (cooked), 1 cup, 5g fiber

Collard greens, 1 cup, 2g fiber

Cauliflower, 1 cup, 2g fiber

Carrots, 1 medium 2g fiber, 1 cup chopped 4g fiber

Artichoke hearts, ½ cup, 4g fiber

Asparagus, 5 spears, 2g fiber

Turnips, 1 cup cubes, 2g fiber

Rutabaga, 1 cup cubes, 3g fiber

Eggplant, 1 cup cubes, 2g fiber

Zucchini/yellow squash, 1 medium, 2g fiber

Spaghetti squash, 1 cup, 2g fiber

Beets, 1 cup, 4g fiber

½ cup **green peas** 4.5g fiber

½ cup cubes of **butternut squash** 3g fiber

½ medium sweet potato (2" by 5") 2g fiber

½ cup corn kernels, 2g fiber

GRAINS

Quinoa/brown rice/couscous... ¼-½ cup is a low source of fiber (1g fiber)

¼ cup rolled or 2 tbsp steel cut oats (raw) 2g fiber

1 slice whole wheat bread 2g fiber

Whole wheat pasta, cooked, ½ cup, 3g fiber

FRUITS

Raspberries, half cup, 4g fiber

Blackberries, half cup, 4g fiber

Wild blueberries, half cup, 3g fiber

Blueberries, raw, half cup, 2g fiber

Strawberries, half cup halves, 2g fiber

Passion fruit, 1 without skin, 2g fiber

Kiwi, 1 medium, 2g fiber

Guava, 1 without skin, 3g fiber

Apple, half of a medium, 2g fiber

Nectarine, one whole, 2g fiber

Banana, half, 2g fiber

INSOLUBLE FIBER SOURCES

Whole grains, nuts, seeds, legumes, green beans, corn, turnips, green peas, kale, apples, berries, leafy greens, avocados

SOLUBLE FIBER SOURCES

While legumes are a better source of insoluble fiber, they are still a good source of soluble fiber. Black beans, kidney beans, and navy beans in particular.

Vegetables; especially squashes, broccoli, carrots, onion, brussels sprouts, asparagus, sweet potato, and turnip

Fruits, especially apricots, prunes, figs, citrus fruits (oranges, lemons, grapefruit), mango, peaches, plums, avocado

Oats; while oats (as a whole grain) are good sources of insoluble fiber, oats are also a good source of soluble fiber (more so than other grains). Rye and barley are other grains that are good sources of soluble fiber.

Most good sources of soluble fiber are also good sources of insoluble fiber, including:

Legumes, oats, fruits, and vegetables

Beta-glucan, a specific type of soluble fiber, is highest in barley, oats, mushrooms, algae/seaweed, and nutritional yeast. This fiber is most well-known for its benefits of reducing cholesterol and blood sugar.

Psyllium is a very high source of soluble fiber and is usually found in supplement form.
